[From the National Intelligen er] Simple Receipt.

GENTLEMEN: Will you please publish the following simple cure for cholera, infantum, diarrhea, colic, and all diseases of the alimentary organs generally in the summer season by the use of fruit or otherwise. I say summer season Paint Brushes, Varnish Brushes, because such diseases are then most rife : but it is equally effectual at any season for the cure of such diseases.

I am as much opposed as any allopathic or homeopathic physician can be to any species of quackery or empiricism. This is the result of many years of positive personal experience in especially for Machine y, and lar Superior to Sperm. my own family-with myself, with my children, with my neighbors, and with my friends and acquaintances. It ought to be every where known. How many children's lives it will save if adopted. It is simply this:

One fourth of an ounce of pulverized cloves, One fourth of an ounce of pulverized cinna-

One fourth of an ounce of pulverized gum guaiacum

Mixed with one pint of old and pure whiskey "To be well shaken before taken." - Dose for an adult, one half of a wine glass, or a large tablespoonful, filled up with water; for a child.

proportionably.
It never fails. One single dose at the inception of any such disease, if not complicated with other maladies, will always, within an hour, cure. If such disease be chronic or has run on for some time, then hourly or daily three or four times.

Diarrhea .- At the present season the following from Dr. Hall's Journal of Health, is worthy or consideration;

Diarrhea is a very c mmon disease in summer time. Cholera is nothing more than exaggerated diarrhea. When a man dies of diarhea, i has died of cholera, in reality. It may be well fine Ostrich Fly Brushes and Parlor for travellers to know that the first, the most Dusters. important and the most incispensable item in the arrest and core of looseness of the bowels is absolute quietude on a bed. The next thing is to eat nothing but HAIR DYES of all kinds. common rice, parched like coffee, and then boiled and taken with a little salt and butter. Drink little or no liquid of any kind. Bits of ice may be eaten and swallowed at will. Every step taken in diarrhea, every spoonful of liquid, only aggravates the disease. If locomotion, is compulsory, the misfortune of the necessity may be essened by having a stout piece of woollen flannel bound tightly around the abdomen, so as to be doubled in front, and kept well in its place. Into the practice of many years we have never failed to notice a gratifying result to follow this observances.

Bailed Wheat for Dessert.—Pick over and wash a pint of white wheat, boil it four hours, put in and salt the same as for rice; refill with boiling water, if more is needed; stir often the last half hour, being careful not to let it burn; cook it dry. Sometimes it looks starchy when first dished, but that soon disappears. Serve hot or cold, with sweetened sweet cream. This we think an excellent dessert, and very fine for .pbilazai

Another very rich dish for dessert can be made of a pint of wheat, cooked like the above then boil in a quart of sweet milk, one cupful of sugar, one cup of raisins, current or any fruit. Or after the wheat is washed, soak it in warm water, simmer the water all out of it: then add the milk and other ingredients and cook as above.

GENTLEMEN: Will you please publish the following simple cure for cholera, infantum, diarrhea, colic, and all diseases of the alimentary organs generally in the summer season by the use of fruit or otherwise. I say summer season Paint Brushes, Varnish Brushes, because such diseases are then most rife; but it is equally effectual at any season for the cure of such diseases

". I am as much opposed as any allopathic or homeopathic physician can be to any species of quackery or empiricism. This is the result of many years of positive personal experience in my own family-with myself, with my children. with my neighbors, and with my friends and acquaintances It ought to be every where known. How many children's lives it will save if adopted.

It never fails. One single dose at the inception of any such disease, if not complicated with other maladies, will always, within an hour, cure. If

such disease be chionic or has run on for some time, then hourly or daily three or four times. ..Diarthea .- At the present season the follow-

ing from Dr. Hall's Journal of Health, is worthy or consideration; Diarrhea is a very c mmon disease in summe

time. Cholera is nothing more than exaggerated diarrhea. When a man dies of diarhea, he has died of cholera, in reality. It may be well Fine Ostrich Fly Brushes and Parlor for travellers to know that the first, the most important and the most inaispensable item in the arrest and cure of looseness of the bowels always prompts this by disincling us to locomotion. The next thing is to eat nothing but common rice, parched like coffee, and then boil ed and taken with a little salt and butter. Drink little or no liquid of any kind. Bits of ice may be eaten and swallowed at will. Every step taken in diarrhea, every spoonful of liquid, only aggravates the disease. If locomotion, is compulsory, the misfortune of the necessity may be lessened by having a stout piece of woollen flannel bound tightly around the abdomen, so as to be doubled in front, and kept well in its place. Into the practice of many years we have never failed to notice a gratifying result to follow this observances.

" Boiled Wheat for Desseit .- Pick over and wash a pint of white wheat, boil it four homs, put in and salt the same as for rice; refill with boiling water, if more is needed; stir often the last halt hour, being careful not to let it burn; cook it dry. Sometimes it looks starchy when first dished, but that soon disappears. Serve hot or cold, with sweetened sweet cream. This we think an excellent dessert, and very fine for invalids.

Another very rich dish for dessert can be made of a pint of wheat, cooked like the above then boil in a quart of sweet milk, one capful of sugar, one cup of raisins, current or any fruit, (raisins are preferable) two beaten eggs: cook slowly till it boils; serve cold or hot, without sause. Or after the wheat is washed, soak it in warm water, simmer the water all out of it then add the milk and other ingredients and cook as above.

For the Girls to Read - A good wife exhibits, her love for her husband by trying to promote his weltare by attention to his comfort. A poor wife "my dears" and "my loves" her husband. and wouldn't sew a button on his coat to keep him, from freezing. A sensible wife looks for her comfort at home—a silly one abroad. A wise girl would win a lover by practicing those virtues girl would win a lover by practicing those virtues which secure admiration when all personal charms have failed of the personal effect. A sample girl endeavors to recommend herself by charms have failed of the personal effect. A simple girl endoavors to recommend herself by the exhibition of frivolous accomplishments and a mawkish sentiment, which are as shallow as her mind. A good girl always respects herself. and, therefore, always possesses the respect of others.
